STOP THAT SCRATCHING

Just as Long as You Have Dandruff Your
Head Will Itch.

It's the little microbes that are gnaw-
ing down into the hair roots. It may
take a long time for the parasites to
get down to the vital part, but
when they do they will destroy the life
of the hair in a very short time.
"My hair was falling out rapidly and
becoming gray when I heard of your

guaranteed hair
restorer, and,
after using
one bottle,
my hair has
stopped falling
out, and I now
have a new growth
of hair, and it is
soft, glossy and
pliable."—Carrie Williams, 844
Clinton Ave. South, Rochester, N. Y.
Parisian Sage, the most delightful hair
restorer, is guaranteed by Red Cross
Pharmacy to stop falling hair, to cure
dandruff and all diseases of the scalp, or
money back. It is the most refreshing
hair dressing in the world. Ladies use
it extensively because it makes the hair
beautiful, soft and lustrous. 50 cents
a bottle at Red Cross Pharmacy or by
express, charges prepaid, from Giroux
Mfg. Co., Buffalo, N. Y.

Bisulphide of Carbon Effective.

The barn, the corncrib, the wheat
bin and even the farmhouse itself can
be infested with all kinds of noxious and
destructive insects and vermin by the use
of bisulphide of carbon, says the United
States department of agriculture. It is
a liquid which forms a powerful and
volatile gas which penetrates every
crack and crevice and kills every bug and
for that matter everything else. The usual
proportion given is one pound to 800
to 1,000 cubic feet. Some authorities
recommend a pound of bisulphide of
carbon for each hundred bushels. No
injury is done the grain by its use, nor
is there any danger from feeding the
grain afterward, as the bisulphide of
carbon entirely disperses. Since the
stuff is very explosive, its use in con-
nection with lighted pipes or cigars
should be precluded.

A New Sulphur Wash.

During the past season the depart-
ment of agriculture has made an im-
portant discovery that the self boiled
lime sulphur wash is not injurious to
peach foliage when properly made and
will not produce russeting and other
injuries effects on apples. Further-
more, it has been found to be about as
effective as a fungicide as the stand-
ard bordeaux mixture. Extensive ex-
periments have been carried on during
the year by the department on nearly
all of the common fruit diseases which
it has been demonstrated that the above
mixture is a very useful one.

A Self Closing Hinge.

A hinge such as is shown in the il-
lustration may be made by the amateur
blacksmith, and it is not only in-
expensive, but is self closing and will
not get out of order or readily break.
It is made by twisting two small rods
of the required size twice around, as
shown in the cut. For small gates one-
quarter inch or three-quarter inch or
three-eighths inch rods are about
right, but for large gates or doors lar-
ger rods should be used. The rods are

HOT WATER FARMING.

An Arctic Circle Miner Who Made a Good

Find.

"Of all farms in the world perhaps
the most remarkable is in Alaska on a
small branch of the Tanana river, only
126 miles south of the Arctic Circle,"
said T. R. Mitchell. "It is owned and
operated by a man named Karshner."

"A few years ago Karshner was en-
gaged in hunting gold when he came
across something which astonished him
greatly. It was a little stream of hot
water. He traced the stream to a
spring, which was likewise hot, and
presently it became obvious that a con-
siderable area was underlain by such
springs. Promptly deciding that this
was a discovery more valuable than a
gold mine, Karshner gave up prospect-
ing, obtained a quantity of vegetable
seeds of various kinds and started in to
raise garden truck."

"The temperature in that region
sometimes falls to 50 degrees below
zero, but a natural stream of hot water
heating, free of cost, was just the thing
for truck gardening near the Arctic
Circle, where potatoes have a market
value of 25 cents and other vegetables
bring prices in proportion."

"The Karshner farm occupies a flat
area with a convenient slant toward the
south. Hot water, oozing out of the
ground, forms three small streams which
empty into the nearby river. The warm
spring extends over a distance of about
a mile, and as the water is so hot, the heat
must be felt to be believed. He goes on
to say that the place has a climate of
its own, for often there is no frost
when it is freezing everywhere else."

"This hot water farmer has seventy
hens and six pigs. He claims that his
crop of potatoes this year will average
over 100 bushels to the acre. Tobacco
grows finely and tomatoes are a success.
Squashes of various kinds are grown,
some of them weighing as much as fifty
pounds. Not content with that,
Karshner gets one dollar apiece for his
muskelmans."—Milwaukee Sentinel.

NOTICE!

ABOUT THE STATE

Frank Huard of Burlington has a Jap-
anese coin, which is believed to be 600

years old. It was found in a collection
of coins which belonged to his grand-
father. It is a copper piece about the
size of an English half-penny. In the
collection are many other coins, among
them being an Irish piece which is over
100 years old.

Leo Ross Grey, an eight-year-old Rut-
land boy, was playing with two school-
mates in the yard of the Columbian
Marble company the other day, attempt-
ing to set a marble slab weighing 400
pounds on end. The lad had pushed it
a short distance when the stone fell, pin-
ning the Grey boy to the ground. Both
bones of his left leg were broken.

Samuel A. C. Atwood, aged 67 years,
and a native of Barnard, died Sunday
at the soldiers' home in Chelsea, Mass.
He served through the war as a private
in Company E, 4th Vermont Infantry.
After the war he practiced law for many
years in Boston. He entered the home
February 19. His death was not unex-
pected. He is survived by a daughter,
Miss Carolyn Atwood of Mattapan.

Children and grandchildren and over
150 neighbors and other friends gathered
Monday at the home of Mr. and Mrs.
Charles L. Stacy of Brattleboro in the
observance of their golden wedding.
Their sons and daughters presented them
\$50 in gold. Mr. and Mrs. Stacy have
lived in Brattleboro since 1890, when
they moved from Halifax. Eleven chil-
dren have been born to them, eight of
whom are living.

The remains of Valere Laliberty were
brought to St. Johnsbury from Somers-
et, Canada, where he died Saturday,
aged 85 years, and where the funeral
was being held at Notre Dame church
Tuesday morning his grandson, Anicet
Laliberty, died in the St. Johnsbury hos-
pital just across from the church. The
grandson was the oldest child of Mr.
and Mrs. Ovide Laliberty, 25 years old,
and his death was caused by paralysis.

The following members of the senior
class of Middlebury college have been
chosen by the faculty for commencement
day speakers June 30: Carson H. Beane
of Middlebury, W. L. Carpenter of Wells,
R. B. Delano of Ticonderoga, N. Y., A.
W. Peach of Brattleboro, L. B. Tobin of
Swanton, J. A. Viole of Fort Edward,
N. Y., O. J. Williams of Rutland, Philip
A. Wright of New Haven, Miss C. H.
Clark of Brattleboro, Miss A. R. Sears
of Bennington, Miss R. O. Stinson of
Proctor and Miss M. M. Whitney of
Marlboro, Mass.

Windham County Commissioners.

The assistant judges of Windham
county court met here Tuesday to ap-
point license commissioners for the town
of Vernon, and as there was no op-
position they appointed the old board,
John T. Wright, George K. Stebbins and
Rodney D. Doolittle. Applications will
be made to the commissioners for a li-
cense for the hotel at South Vernon,
and there will be opposition.

One of the new laws provides that
no license shall be granted for the sale
of liquor nearer the state line than the
chief village of the town. Heretofore
the license in Vernon has been exercised
as South Vernon, but a large part of
the village of which South Vernon is
a part is over the line in Massachusetts,
and it will be claimed that South Ver-
non is not the principal village in the
town.

If that contention prevails there may
be no license granted in the town, as
it is understood none is wanted in the
other villages. The assistant judges
are Fred B. Pier of Rawsonville and
Frank Worden of Halifax.

HOT WATER FARMING.

An Arctic Circle Miner Who Made a Good

Find.

FARMER A BUSINESS MAN.

Prosperity of the Country Depends
Upon System.

To be up to date the farmer must
plan ahead. If he is wise he will open
accounts in his ledger for every crop
he raises, including horses, cows,
sheep, swine and poultry. He will
have a system of bookkeeping that
will show him at the end of the year
which crop paid a profit and which
created a loss.

It will be a great satisfaction to
know how the potato, the onion, the
general garden, the hay and the straw
crops paid. His ledger will show how
many days his teams worked, credit-
ing them with such amounts as he
would have had to pay had he hired
teams to do the work. Against this
will be the price of feed. There need
be no item for labor in attending to
the horses, as the manure and the use
of the animals for pleasure drives will
offset that.

The income from the cows and the
sheep, the swine and the poultry
would have their place, against which
would have to be the cost of feed.

The writer knows of a progressive
farmer who follows that system year
after year. His daughter keeps the
books. He reports each night the
sales, the purchases, the hours the
teams were at work, etc., and thus
he is able to keep a record of his do-
ings and knows exactly what each
crop means to him.

Beginning the new year, the farmer
should lay out his plans for the spring
operations, the size of the vegetable
garden, the varieties to grow, the in-
crease of the small fruit plots and the
additional trees to the orchard, the
changes and the repairs that should
be made to the barn and other build-
ings, not forgetting improvements on
the old homestead.

There are a hundred and one mat-
ters that can be planned for 1909's
operations, and no better use could be
made of one's evenings than to map
out all these matters.

The latest catalogue of reliable
seeds, nursery and implement houses
can be secured, and profitable time
may be spent in carefully looking
them over. Lists of seeds, trees, tools,
etc., should be got out and ordered be-
fore the general rush in spring. This
will avoid delays, errors and vexations
generally.

The farmer is a business man, and
each year the farm is becoming more
important to the welfare of the coun-
try. The farmer is no longer the sub-
ject of ridiculous cartoons, but the
emblem of property in all the high
class publications. The whole world
looks to the sturdy tiller of the soil
for the means of maintaining prosper-
ity in the land.

THE DEATH PENALTY.

Horror Incident to Old Time Ex-

ecution by Drowning.

Execution by drowning was abol-
ished in France by Henri Quatre, only
to be revived by one of his successors.
It was finally abolished as a statutory
method of execution by the earliest de-
cree of the great revolutionaries.

As late as the eighteenth century
death by drowning was decreed to a
felon in Edinburgh, and in the middle
ages it was a common enough mode
of doing a convicted criminal to death.
That execution of this nature was con-
sidered as humane as any other, so far
as the victim was concerned, is shown
by the fact that it was not unknown
among the early Jews, who varied the
punishment of stoning adulteresses by
drowning them. Among the Egyptians
it was common. The Roman legions
sanctioned the method by placing it
on the statute books. Tacitus tells
us that the Germans copied the prac-
tice from the Romans. The Teuton
termed it the "last baptism," and he
did not allow his powers of imagin-
ation to sleep when he set about de-
vising additional varieties which
should add to the excitement attend-
ing upon the doomed person's depar-
ture from life. The convict was sewed
up, Monte Cristo fashion, in a bag, and
with him were inclosed a vicious dog,
a hungry cat, a violent rooster, a ven-
omous viper, all very much alive and
presumably kicking.

For what reason it is hard to see,
but death by drowning was by many
peoples considered preferable for crim-
inal women. In the case of very de-
based or very mean offenders the
Romans had a more or less pleasant
fashion of drowning the doomed ones
in marshes, first incasing them in
elaborate crates.

For refined cruelty in killing off their
female criminals the earlier Albanians
were certainly the most inventive in
the matter of ingenuity. It is com-
monly known, of course, that even the
modern Albanian has less respect for
womanhood than any other known race
in the human catalogue, not even ex-
cluding the Chinese. The approved
method of doing a criminal or even a
displeasing woman to death prevalent
among them up to rather less than a
century ago was to chain her in a tank
into which the water was allowed to
flow gradually. As the water reached
her breast it was allowed to recede,
sometimes back to her ankles, when
the refilling of the tank began anew.
If the woman had children the torture
was varied by the drowning or mutila-
tion of them before her eyes. To vari-
ous parts of her body was attached
such food as attracts rats, of which
a number would be let loose.—New
York World.

Law Points.

A street is held in Buffalo versus
Delaware L. and W. R. Co., 100 N. Y. 84;
22 N. E. 512; 16 L. R. A. (N. S.), 506,
not to be destroyed by the construction
of a wharf thereon by the abutting
owner.

An adjudication of bankruptcy is
held in Mills versus Fisher (C. C. A.),
100 Fed. 207; 18 L. R. A. (N. S.), 659,
not to be warranted by the preference
of a firm creditor by a partner out of
his own property, although his credit
is the sole asset of the partnership.

HAIR TELLS CHARACTER.

Color of Hair Said to Indicate a Per-
son's Temperament.

Many people believe that blonde, or
light hair denotes affection and dark
hair constancy. A person without hair
is not devoid of character; far from it.
The disposition of the average bald-
headed man is to show such solicitude
for the welfare of others, that he neg-
lects himself. A germ causes baldness,
Prof. Sabouraud, of Paris, France, in-
noculated a rabbit with Dandruff germs,
causing it to become totally bald in five
weeks' time. To rid the scalp of these
dangerous germs it is necessary to apply
Newbro's Hairdye.

"Destroy the cause—you remove the
effect."

ESTATE OF ANDREW TACY.

STATE OF VERMONT. In Probate Court
District of Washington, in and for the
County of Franklin, ss.: On the 2nd day
of March, A. D. 1909.
Gertrude M. Russell, Executrix of the last Will
and Testament of Andrew Tacy, late of the
City of Barre, in said District, deceased, pre-
sents her administration account for examina-
tion and allowance, and makes application
for a decree of distribution and partition of the
estate of said deceased. Whereupon, it is or-
dered by said court that said account and said
application be referred to a session thereof, to be
held at the Probate Office in said District, on the
23rd day of March, A. D. 1909, for hearing and
decision thereon. And it is further ordered that
notice hereof be given to all persons interested
in the estate of said deceased. Whereupon, it is
published by the same three weeks success-
ively in the Barre Daily Times, a newspaper
published in the City of Barre, Vermont, pre-
vious to said time appointed for hearing,
that they may appear said time and place and
show cause, if any they may have, why said
account should not be allowed, and such decree
made.

By the Court, Attest,
MELVILLE E. SMITH, Register.
